

# Exploring new paths

**Dr. Hansjoerg Rodi**  
**Executive Vice President Road Logistics**

2022 was the most successful year of road logistics ever. A warm thank you to everybody, who contributed to this success, which was the outcome of a very successful implementation of our strategic initiatives.

If now we look into what we have done in the Roadmap 2026, is built very much on continuity. So we will continue focusing on customer solutions tailor-made to regional customer demands. Delivered by our passionate people. We will continue investing into technology in order to allow our people to take decision based on data. And we will define and implement our contribution into the electrification of road logistics.
